

# Graduate Major in Materials and Information Sciences Briefing Session

A new interdisciplinary graduate major for doctoral students  
"Materials and Information Sciences" starts in April 2025.

If you are interested in this graduate major, please participate in the briefing session.

## ► Schedule

**Wed., April 16, 2025**

To be live-streamed using Zoom

- ① 17:15~18:00 Explanation in Japanese
- ② 18:00~18:45 Explanation in English

**Registration required.**

## ► How to register

If you wish to participate in the briefing session,  
please register from the website below.

In order to foster outstanding individuals, the Institute established the Tokyo Tech Academy for Convergence of Materials and Informatics (TAC-MI) in April 2019 under the auspices of MEXT's WISE Program. The TAC-MI program is a seamless educational program provided throughout graduate learning, which aims to empower students to become **multitalented individuals** capable of promoting creative, interdisciplinary research in materials science and informatics.

In April 2025, the TAC-MI program is further developed, and a **new interdisciplinary graduate major for doctoral students "Materials and Information Sciences"** has been established.

In this graduate major, we provide practical education with an eye on social services in collaboration with partners from industry, and will enable students to connect information and materials by utilizing information science and multifaceted thinking, as well as by taking a broad perspective.

**We offer the scholarship and RA salary that helps students enrolled in this graduate major** to be financially independent and allows them to concentrate on their studies.

**Students wishing to enroll in this major must undergo an eligibility screening prior to entering the doctoral program. Applications for the eligibility screening can be made from the first year of the master's program.**

**Details will be explained at the briefing session.**
